Bill,

Yes, I think we may want to talk about Watertown. We have some non-CSO related concerns regarding the Watertown permit pertaining to their acceptance of hydrofracking wastewater (there should be limits in their permit for TDS and rads). Are you and Brian available sometime in the next week or so?

Thanks,
Michelle

Hi Michelle,

I am presently working on the City of Amsterdam and expect to start working on Watertown's permit modification within the next 2 weeks. Do you wish to discuss either of these?

Hi Bill,

Thanks again for all the information. Are you working on a permit modification for Watertown as well?

Subject: Status of LTCP Work

Jeff and Michelle,

This is to follow up on your request during your April 26 CSO telecon with Cheryle Webber, at which time you requested that I provide you with a status update on LTCP work for the cities of Amsterdam and Watertown. I am sorry for the delay.

I have requested the treatment plant operators for both municipalities to provide me with updates by either email or fax. I expect to have these by the end of this week. As soon as I receive the updates, I will forward them on to you.

Concerning the City of Amsterdam, the LTCP was approved by the DEC on July 5, 2007. It has the "old" SPDES permit language which requires permit modification after approval of the LTCP. This has been put on hold because the Department is also modifying the permit under the Environmental Benefit Permit Strategy, and will incorporate the LTCP-related requirements in the overall modification. The EBPS modification is commencing now and should be completed by early summer.

Concerning the City of Watertown, the LTCP submittal date to the Department (for review and approval) has been moved back to August 1, 2010. The city has hired a consultant to perform its modeling, and the work is proceeding, as will be discussed in the operator's summary.

Again, the LTCP-related summaries will be sent to you as soon as I receive them, which should be by the end of this week.

Please let me know if you have any questions.

Thanks,
Bill Mirabile
